E. Y. Rodin	1 Speed of publication—An editorial
N. S. Papageorgiou	3 Walras allocations in infinite dimensional economies
R. Chabour and H. Hammouri	7 Stabilization of planar bilinear systems using an observer configuration
K. Farahmand	11 Crossings of a random trigonometric polynomial
N. Mandal and B. N. Mandal	17 Integral expansions related to Mehler-Fok type transforms
H. L. Arora and F. I. Abdelwahid	21 Solution of non-integer order differential equations via the Adomian decomposition method
Ll. G. Chambers	25 Upon a variational principle
M. P. Ramachandran	27 A note on the integral equation method to a diffusion-reaction problem
H. Hammouri and K. Busawon	31 A global stabilization of a class of nonlinear systems by means of an observer
A. G. Ramm	35 Uniqueness and inversion of cone beam data
E. Krusinska	39 An exploratory criterion for variable selection in L_p -logistic discrimination
J.-S. Le Brizaut	43 Functional solution of an identification in a vulcanization process
S. Qian and J. Weiss	47 Wavelets and the numerical solution of boundary value problems
B. D. Czejdo, R. P. Tucci and D. W. Embley	53 Expressing quantification in relational calculus by participation constraints
A. Broido	57 Summing up function values in parallel: A complexity analysis
A.-P. Liao	63 Superlinear convergence of a class of θ -bounded rank-one update methods
K. L. Teo, W. X. Zheng, L. S. Jennings and P. B. Chapman	69 A numerical approach to computing eigenvalues in a turbulent dispersion model
J. M. Rakotoson and B. Simon	75 Relative rearrangement on a measure space application to the regularity of weighted monotone rearrangement Part I

J. M. Rakotoson and B. Simon

T. Tanaka and D. Kuroiwa

A. Debussche and R. Temam

V. Oliker and E. Newman

**B. Fuchssteiner and
M. Lo Schiavo**

**B. Fuchssteiner and
M. Lo Schiavo**

E. Y. Rodin

H. H. Yang

M. A. Kelmanson

**M. Barbieri, M. Maioli and
A. Sacchetti**

**P. B. Bochev and
M. D. Gunzburger**

R. U. Verma

H. Freistühler

A. Zafer and R. S. Dahiya

M. J. Kaiser

G. Sundaram and S. S. Skiena

**H. Wang, R. P. Tewarson,
J. F. Jen and J. L. Stephenson**

W. Hochstättler

79 Relative rearrangement on a measure space application
to the regularity of weighted monotone rearrangement
Part II

83 The convexity of A and B assures
 $\text{int } A + B = \text{int}(A + B)$

87 A convergent family of approximate inertial manifolds

91 The energy conservation equation in the reflector
mapping problem

97 Nonlinear PDE's and recursive flows: Theory

101 Nonlinear PDE's and recursive flows: Applications

NUMBER 2

1 Speed of publication—An editorial

3 The computational boundary method for solving the
incompressible flows

9 Nondegeneracy of Hopf points emanating from a
 Z_2 -symmetry-breaking Takens-Bogdanov point

13 A Fourier inversion formula for evolutionary trees

17 Unstructured rectangular mesh generation for adaptive
two-dimensional conservative schemes

23 Singular continuous spectrum in a class of random
Schrödinger operators

27 A least-squares finite element method for the Navier-
Stokes equations

31 General approximation-solvability of nonlinear
equations involving \mathcal{A} -regular operators

35 Non-uniformity of vanishing viscosity approximation

43 Oscillation of bounded solutions of neutral differential
equations

47 The Santalo point of a planar convex set

55 An anomaly concerning ties in lotto-like games

61 A comparison of multinephron and shunt models of the
renal concentrating mechanism

67 Nested cones and onion skins

A. Zafer and R. S. Dahiya	71 Oscillation of a neutral difference equation
A. Bacciotti	75 The potentially global stabilization property of certain planar systems
H. C. Tuckwell	79 Random fluctuations at an equilibrium of a nonlinear reaction-diffusion equation
P. Lory	83 A mathematical modeling technique for renal counter-flow systems
Y. Deng, J. Glimm, Q. Yu and Moshe Eisenberg	89 Global minimization for problems with multiple local minima
A. B. Philpott and A. I. Mees	91 A finite-time algorithm for shortest path problems with time-varying costs

NUMBER 3

E. Y. Rodin	1 Speed of publication—An editorial
A. V. Goldberg and T. Radzik	3 A heuristic improvement of the Bellman-Ford algorithm
P. C. Kainen and V. Kůrková	7 Quasiorthogonal dimension of Euclidean spaces
K. Kime	11 Control of transition probabilities of the quantum-mechanical harmonic oscillator
M. J. Kaiser	17 The perimeter centroid of a convex polygon
C.-R. Jou and J.-C. Yao	21 Extension of generalized multi-valued variational inequalities
F. Harary and M. Livingston	27 Independent domination in hypercubes
P. Lin	29 A note on a mildly nonlinear turning point problem
H. A. Farhat	33 A series of impulse functions as a model for random detectability profiles
T. F. Coleman and A.-P. Liao	37 The local convergence of the Byrd-Schnabel algorithm for constrained optimization
G. Kondor	43 Newspaper recycling: The measurement of yield loss
J. C. Gilbert and J. Nocedal	47 Automatic differentiation and the step computation in the limited memory BFGS method
T. Tanaka and D. Kuroiwa	51 Some general conditions assuring $\text{int}A + B = \text{int}(A + B)$
G. Rosensteel	55 Lax representation of Riemann ellipsoids
M.-Q. Zhang	59 Algorithms that preserve the volume amplification factor for linear systems
Y.-K. Kwok and K.-K. Tam	63 Modified quadrature formula for integrand with nearby poles

R. E. Kooij and C. J. Christopher	51 Algebraic invariant curves and the integrability of polynomial systems
Z. W. Trzaska	55 Numerical triangle, Fibonacci sequence and ladder networks: Some further results
Ya. I. Alber	63 The regularization method for variational inequalities with nonsmooth unbounded operators in Banach space
P. Adda	69 Stabilization of bilinear systems with 2 inputs
S. Owa, H. Saitoh and M. Nunokawa	73 Neighborhoods of certain analytic functions
S. S. Cheng	79 A Hille-Wintner type comparison theorem for n^{th} order linear differential equations
M. Ahues, A. Largillier and B. Limaye	83 A note on iterative refinement schemes for Sylvester operator equations
A. Largillier and M. Levet	87 A note on a collectively compact approximation for weakly singular integral operators
M. Levi	91 Gyroscopic effects in a rotating sleeve hydrocyclone
D. Chen and I. K. Argyros	97 A fourth-order nonlinear iterative method in Banach spaces
H. M. El-Sherbiny	99 Conservation laws of a class of differential equations II

NUMBER 5

E. Y. Rodin	1 Speed of publication—An editorial
A. Class, A. Bayliss and B. J. Matkowsky	3 Localized ordered structures and flame stretch
T. E. Simos	9 A high order predictor-corrector method for periodic IVPs
S. Jansche	13 Norm inequalities involving ordinary and Jacobi derivatives
Y.-H. Liu	21 A heuristic algorithm for the multi-criteria set-covering problems
G. R. Waissi	25 A unifying probability density function
I. Perugia	27 A class of quadrilateral finite elements for the Stokes problem
D. Serre	31 Sur une équation fonctionnelle
G. Adomian and R. Meyers	35 Nonlinear transport in moving fluids
V. Jeyakumar and B. M. Glover	39 A new version of Farkas' lemma and global convex maximization

Q. Zhang	45	Some complex equations arising in Hele Shaw flow
N. Hashimoto	49	A regularization of Dirac delta function for a singular analytic function
X. Ye and G. Anderson	55	The minimal support discrete divergence free basis functions for a mini-element
M. Pogu and J. E. Souza de Cursi	59	The numerical effect of an artificial term, solving a mixed partial differential equation
R. P. Tewarson	63	Inverse problem for kidney concentrating mechanism
W. Wenzel	67	Δ -matroids with the strong exchange conditions
I. K. Argyros	71	The convergence of a Halley-Chebysheff-type method under Newton-Kantorovich hypotheses
V. Drăgan	75	A "small gain" theorem for time-varying systems
J.-C. Luo	79	An optimum partition for inverting a nonsingular matrix
A. G. Ramm	85	Scattering amplitude as a function of the obstacle
A. G. Ramm	89	Scattering amplitude is not a finite rank kernel in the basis of spherical harmonics
A. Heibig	93	Entropy estimates for conservation laws
N. S. Papageorgiou	99	Periodic solutions of nonconvex differential inclusions

NUMBER 6

E. Y. Rodin	1	Speed of publication—An editorial
P. Favati, G. Lotti and F. Romani	3	Bounds on the error of Fejer and Clenshaw-Curtis type quadrature for analytic functions
C. Conca and H. Puschmann	9	Hermitian quadratic eigenvalue problems of restricted rank
A. G. Ramm and D. N. Ghosh Roy	15	Inverse geophysical problems for some noncompactly supported inhomogeneities
A. G. Ramm	19	New method for proving uniqueness theorems for obstacle inverse scattering problems
L. S. Hou and H. Manouzi	23	A div-curl formulation of the Stokes boundary value problem based on a Harmonic representation formula
M. Abounouh	29	Asymptotic behaviour for a weakly damped Schrödinger equation in dimension two
A. V. Balakrishnan and R. Triggiani	33	Lack of generation of strongly continuous semigroups by the damped wave operator on $H \times H$ (or: The little engine that couldn't)

M. Wild	39	Axiomatizing simple binary matroids by their closed circuits
A. Cañada and J. L. Gámez	41	Some new applications of the method of lower and upper solutions to elliptic problems
G. M. Lee, D. S. Kim, B. S. Lee and S. J. Cho	47	Generalized vector variational inequality and fuzzy extension
R. Ahlswede, N. Cai and U. Tamm	53	Communication complexity in lattices
H. Alkahby and T. Hussain	59	The heating of the solar corona by the resonant absorption of Alfvén waves
T.-C. Tuan	65	A near-optimal Manhattan channel router for a class of nets with the shift-right-one pattern
R. P. Tewarson	71	Models of kidney concentrating mechanism: Relationship between core concentrations and tube permeabilities
B. Michaux and J. M. Rakotoson	75	Remarks on Navier-Stokes equations with measures as data
J. P. Delgrande and A. Gupta	79	Two results in negation-free logic
M. A. M. Alwash	85	Some conditions for a center of autonomous and nonautonomous systems
R. Chabour and P. Florchinger	91	Exponential mean square stability of partially linear stochastic systems
X. Cai	97	A solvable case of the variance minimization problem
P. Lory	101	Errata to "A mathematical modeling technique for renal counterflow systems"
